

Certified Nursing Assistant

Program Description:

The C.N.A./Home Health Aid Program is a 16 week classroom and internship experience that will prepare you to be successful for the Certified Nursing Assistant state licensure. There are 14 weeks of classroom instruction and a clinical experience, and a two week test-preparation and testing period.

Training and Experience:

Clients will have experiences in the classroom and C.N.A. Lab along with an internship experience at a local nursing home. Students are required to have a TB test and other required vaccinations.

Certifications:

Certifications may be earned in CPR/First Aid; C.N.A. Licensure; and Home Health Care.

Career Outcomes:

The Certified Nursing Assistant Program prepares students to test for their state C.N.A. licensure. Students attaining licensure can work in nursing homes, rehabilitation centers, hospitals, clinics, and other places that provide medical services. Some careers in the Home Health field include private home health care or working for a Home Health provider.

Program Criteria:

Clients participating in the C.N.A./Home Health Aid Program must have:

- A 4th grade reading level or above
- The ability to lift 40- 50 pounds.
