

# Low Voltage Wiring

## Program Description:

Low Voltage Wiring is a 16 week program that is a component of construction but moves into the installation of cable; internet; audio-visual systems; outdoor lighting; and security systems.

## Training and Experience:

Clients will have both classroom and hands-on building and wiring experiences. Classroom instruction will include opportunities for earning several industry- recognized certifications. Students learn some aspects of high voltage electricity and construction as well.

## Certifications:

Clients may earn certifications in OSHA-10; RESI (Residential Electronics Systems Integrator); CEDIA (Custom Electronics Design and Installation Association); and CPR/First Aid.

## Career Outcomes:

Clients completing the Low Voltage wiring program are prepared for a variety of careers in this field that includes employment with cable and internet providers; phone companies; outdoor lighting contractors; and security system providers. There are also career opportunities to install audio-visual equipment and sound systems.

## Program Criteria:

**Clients participating in the Low Voltage Wiring Program must have:**

- An 8th grade reading level or above; and,
- The ability to lift at least 50 pounds.
